

An Analysis of STEM Supply-Demand in SC

INTRODUCTION

With advancements and innovations in technology, the workforce of South Carolina needs comprehensive knowledge of Science, Technology, Engineering, and Mathematics (STEM). Is South Carolina producing the right STEM knowledge at the right levels? By taking a look at what jobs employers are advertising, you can see what may or may not be needed, in the near future.

STEM OCCUPATIONS

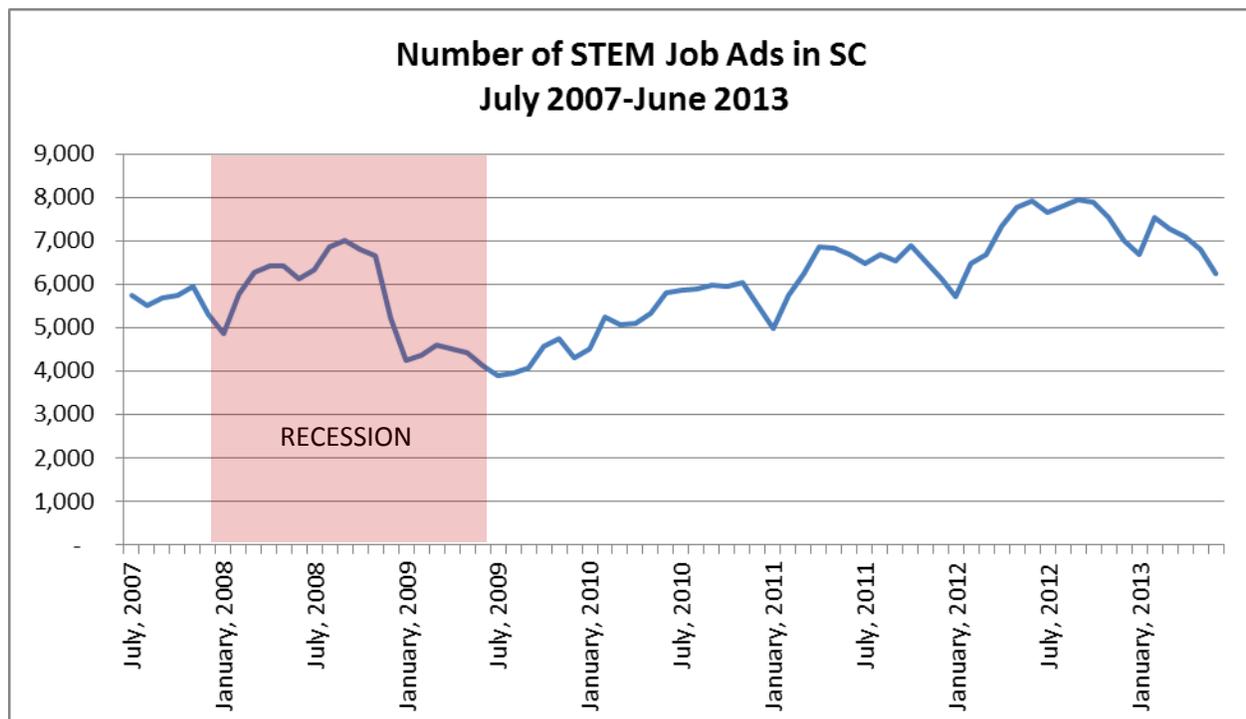

The US Department of Labor's Bureau of Labor Statistics (BLS) lists 184 occupations as STEM-related. These differ from other lists such as the Occupational Network (O*Net) and the 16 career clusters used in SC public schools that were developed by the Perkins Collaborative Resource Network. The BLS list includes the usual science, technology, engineering, and math occupations, plus some occupations in the areas of information technology, management, education, healthcare, and sales.

DATA

Most of the data used to analyze the demand for STEM experience is from The Conference Board Help Wanted OnLine® Data Series (HWOL). It "measures the number of new, first-time online jobs and jobs reposted from the previous month for over 16,000 Internet job boards, corporate boards and smaller job sites that serve niche markets and smaller geographic areas" (from www.conference-board.org/data/helpwantedonline.cfm). It is a robust data resource for determining short-term employer demand. Supply data is from the SC Commission on Higher Education using completers from post-secondary institutions of learning.

HISTORICAL DATA

STEM ads since July 2007 have seen a fairly steady increase, except right after the recession ended in 2009 when it bottomed out at 3,879 in July. The highest level was recorded in September 2012 at 7,935, and is currently (June 2013) at 6,235.

An Analysis of STEM Supply-Demand in SC

STATEWIDE SUMMARY

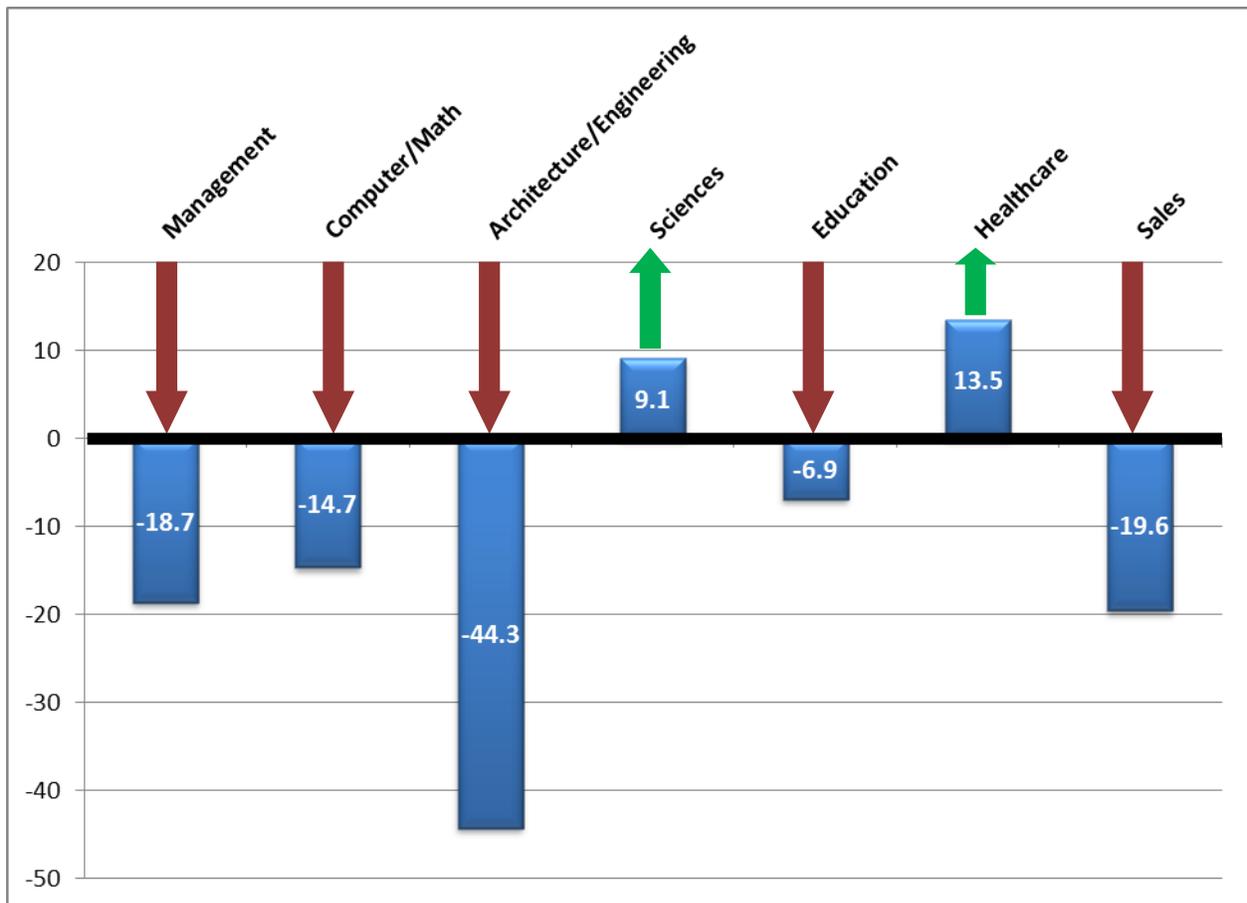

Job ads for STEM occupations totaled 16,508 in July 2013, down 3.0 percent from the July 2012 level of 16,998.

There were two major occupational groups that had overall growth from July 2012 to July 2013:

- Life, Physical, and Social Science: 9.1 percent
- Healthcare Practitioners and Technical: 13.5 percent

Five major categories reported losses:

- Management: -18.7 percent
- Computer and Mathematics: -14.7 percent
- Architectural and Engineering: -44.3 percent
- Education, Training and Library: -6.9 percent
- Sales and Related: -19.6 percent

An Analysis of STEM Supply-Demand in SC

When looking specifically at the occupations, there are many that are growing.

Growing STEM Job Ads in SC, July 2013

<i>Occupation</i>	<i>Jul-13</i>	<i>Jul-12</i>	<i># change</i>
Computer and Mathematical Occupations			
Database Administrators	158	127	31
Computer Network Architects, Telecommunications Engineering Specialists	76	70	6
Network and Computer Systems Administrators	615	612	3
Statisticians	7	4	3

Psychiatrists	79	74	5
Emergency Medical Technicians and Paramedics	62	60	2
Sales and Related Occupations			
Sales Engineers	56	51	5

There was an abundance of advertisements in the Healthcare Practitioners and Technical occupations from 2012 to 2013. Most of the growing jobs required extensive post-secondary or advanced education.

An Analysis of STEM Supply-Demand in SC

Job ads for engineering occupations decreased the most with industrial, mechanical, electrical, and civil engineering ads dropping triple digits over the year. The data also shows the need for physical and occupational therapists has declined.

Declining* STEM Job Ads in SC, 2012-2013

<i>Occupation</i>	<i>Jul-13</i>	<i>Jul-12</i>	<i>% change</i>
Management Occupations			
Medical and Health Services Managers	542	637	-95
Architectural and Engineering Managers	121	163	-42

OTHER JOB AD INFORMATION

Eighty-two percent of the STEM job ads are full-time, permanent positions.

STEM jobs ads do not stay in the system long, intimating that there is a fairly smooth supply-demand interface. Almost 50 percent of the ads stay online for 59 days or less.

An Analysis of STEM Supply-Demand in SC

CERTIFICATIONS AND SKILLS

HWOL also allows tracking of professional certifications and skills mentioned in online ads. Those interested in STEM careers would be wise to get a healthcare-related or Top Secret certification and hone their communication and problem-solving skills.

Top Certifications Requested in STEM Job Ads in SC, July 2013

Certified Registered Nurse
Basic Life Support
Certification in Cardiopulmonary Resuscitation
Advanced Cardiac Life Support
Licensed Practical Nurse
Top Secret Sensitive Compartmented Information
Occupational Safety & Health Administration Certification
Physical Therapist Certification
Board Certified
Pharmacy Technician

Top Skills Requested in STEM Job Ads in SC, July 2013

Oral and written communication skills
Problem solving
Cash registers
Customer service oriented
Sales experience
Self-starting / Self-motivated
Microsoft Office
Troubleshooting
Detail oriented
Organizational skills

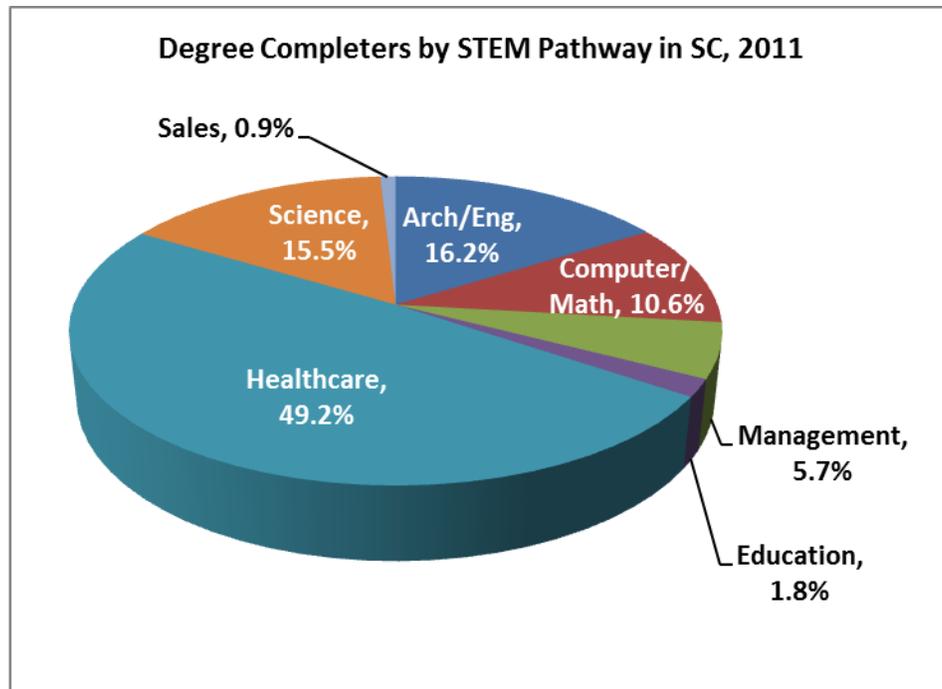

An Analysis of STEM Supply-Demand in SC

SUPPLY vs. DEMAND

After reviewing the demand, does South Carolina have enough qualified, trained people to keep the STEM workforce pipeline flowing?

Data from the SC Commission on Higher Education (CHE) (http://www.che.sc.gov/New_Web/Data&Pubs.htm) on college graduates was used as the supply data.

STEM Pathway	Certificate	Diploma	Associate	Bachelors	Post Bach	Masters	Doctors-Research	Doctors-Prof. Practice	Total	% of Total
Architecture & Engineering	565	59	477	1,044	-	419	112	-	2,676	16.2
Computer & Math	375	-	469	732	3	135	48	-	1,762	10.6
Management	184	-	376	366	-	17	7	-	950	5.7
Education	-	-	-	271	-	32	-	-	303	1.8
Healthcare	2,385	1,045	2,055	1,475	10	537	133	491	8,137	49.2
Science	16	-	2	2,220	6	198	127	-	2,569	15.5
Sales	62	-	86	-	-	-	-	-	148	0.9
									16,545	

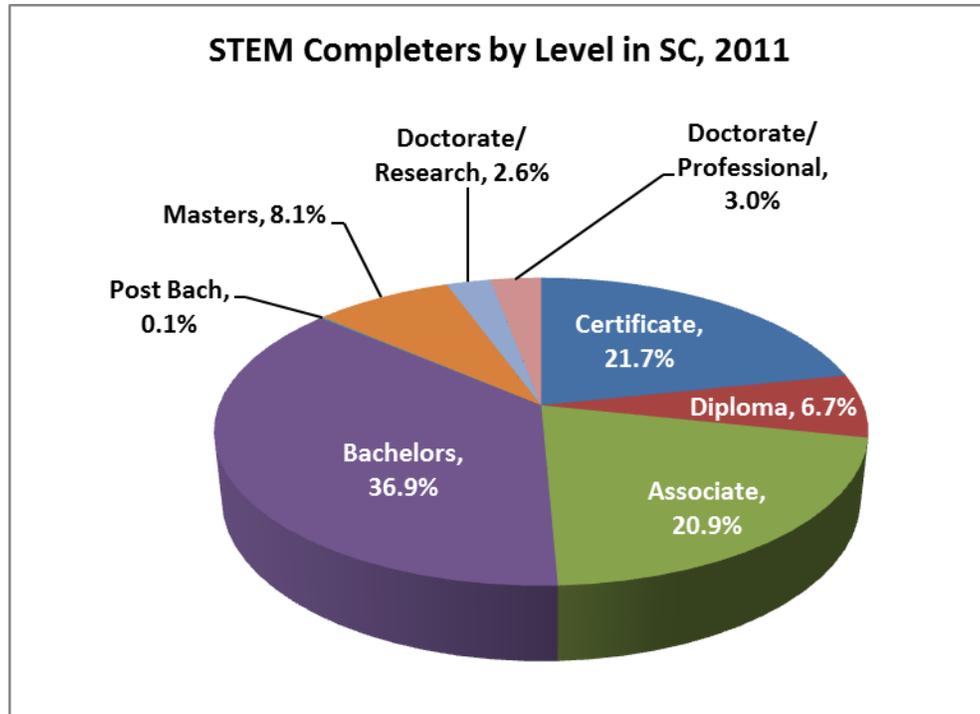

There were 16,545 STEM-related degrees awarded in 2011. CHE has collected data from all public and private schools in the state. Healthcare degrees were the highest, bringing in almost 50 percent of the STEM degrees awarded.

An Analysis of STEM Supply-Demand in SC

It is interesting to note that 49.3 percent of the STEM degrees awarded were less than a Bachelor's degree.

		% of Total
Certificate	3,587	21.7
Diploma	1,104	6.7
Associate	3,465	20.9
Bachelors	6,108	36.9
Post Bach	19	0.1
Masters	1,338	8.1
Doctorate-Research	427	2.6
Doctorate-Prof. Practice	491	3.0

An Analysis of STEM Supply-Demand in SC

Supply-Demand Analysis for STEM Jobs in SC

	Supply	Demand	Difference (S-D)
Architecture & Engineering	16.2	12.7	3.5
Computer & Math	10.6	23.4	-12.8
Management	5.7	4.8	0.9
Education	1.8	0.8	1.0
Healthcare	49.2	54.3	-5.1
Science	15.5	1.7	13.8
Sales	0.9	2.4	-1.5

When comparing supply to demand, there were only a few STEM areas that have equilibrium. Management, Education, and Sales were fairly balanced.

The largest difference was in Science where the data show much more supply than demand. The majority of Science degrees conferred was in Biology. The Computer and Mathematics pathway was also out of balance with a very large need for more individuals with those degrees in order to fill the demand. The demand was mostly in the Computer side of this category.

CONCLUSION

Although the overall number of STEM jobs advertised online has been declining, there is still a great need for certain types of STEM jobs such as in Healthcare and Science. Specific STEM occupations that had a large increase in job ads include higher-level nursing (Registered, Advanced Psychiatric, and Acute Care) and Nurse Practitioners, along with Database Administrators. Declining STEM jobs were mostly in engineering (Industrial, Mechanical, Electrical, and Civil Engineers) and medical therapy (Physical and Occupational Therapists).

Geographically, the metropolitan areas (Richland, Charleston, Greenville, and Horry counties) are the most flush with STEM job ads.

There were 16,545 higher-education graduates with STEM-related training in 2012. Most were in Healthcare, and Architecture and Engineering. Over 49 percent of those STEM graduates received degrees, certificates, or diplomas that required less than a bachelor's degree.

There is a mismatch in Science (more supply than demand), especially in Biology. With more demand than supply, the state needs to graduate more students with degrees in the STEM-related areas of Computer Science.
